This document contains release notes for the Version 3.6 release of FOIAonline, for release after COB on November 30, 2018. This document provides a summary of enhancements, bug fixes, and other updates contained in the release.

New Enhancements

- Added functionality to reassign case files and tasks to a user's default actual agency when user's agencies are updated.
- Added the ability for users to create PDF versions of reports via the Print function.
- Updated the address fields so U.S. territories display in the State/Province dropdown.
- Added ability to select from a user's multiple actual agencies when creating tasks.
- Updated role restrictions on the Year-End Annual Report page so National Team and Coordinators can access the page, and National Team users can view, edit, delete, and finalize reports.
- Added a loading message on the public user records page.

Bug Fixes

- Fixed issues on Raw Data Export where:
    - Report generation would not delete from Java, even when there was an error, causing the generation to stall.
    - Report would pull information for tasks that were not pending or closed during the fiscal year.
    - Report would pull Expedited Processing and Fee Waiver dispositions from the case instead of from the Task Outcome field.
    - Days Tolled logic was incorrect and would result in negative values.
    - Initially Received column would not pull the correct date for all case types.
    - Perfected Dates occurring after the end of the fiscal year were being incorrectly included.
    - Fee Waiver Date Adjudication Began column would pull Task Submitted Date instead of the Adjudication Start Date.
- Fixed issue on Year End Annual Report where:
    - Section IV would incorrectly include statutes used on appeals.
    - Section VII.D would include metrics for cases perfected after the end of the fiscal year.
    - Only "Other" Dispositions in the Agency Administration pages would be included instead of dispositions used on cases.
    - Clock days were pulled as is from the index instead of being calculating for each section that looks at processing time.
    - Updated Reports table to default sort in descending order of fiscal year.
- Fixed issue on Admin Cost page where:
    - Non-System User data would be cached and cause errors when an agency user tried to save.
    - Total field would calculate based on the Loaded Rate instead of the Billing Rate.
    - Microfiche Reproduced and All Special Services cost types would not display the correct amount fields.

- Fixed issues with the display of clock stoppage information on the Clock Details page.
- Fixed issue where cases with double quotes in the Close Out Information section would not be accessible to users.
- Fixed issue where agency users would not be able to access assigned cases via search.
- Fixed issue where users could set the Offline Closure Date before the Perfected Date.
- Fixed issue with Advanced Search where "contains" logic would cause search results to include false matches.
- Fixed issue where Reply links would display in system generated correspondence to registered users.
- Fixed issue where action menu was not updated after a requester withdrew a case.
- Fixed issues where discounts were not correctly applied when estimating costs.
- Fixed issues where guest user profiles were sometimes pulled instead of the registered user profile when the email addresses matched.
- Fixed issue where changes to an agency's costs and/or rates in the Administration pages would not be reflected for the entire agency.
- Fixed issue where modified descriptions would not display in exports.
- Fixed issue where the Additional Sub-Agency drop-down would display on the Edit Request page when no additional sub-agency existed.
- Fixed issue where Expedited Processing tasks would re-open when the Submission Details page was edited.
- Fixed issue where Additional Disposition would not populate in the Closure Information section of a task on an appeal.
- Fixed issue where the Close Out Information section on case files or records would display "N/A" or "Select "Other" Disposition" instead of a blank field.
- Fixed issue where the Closed Date field in the Closure Information section would pull from the Final Disposition Notice task instead of the case.
- Fixed issue where the Offline Closure Field on the Final Disposition Notice task would pull from the task explanation field instead of the case completed date.
- Fixed issue where the Closed Date for Expedited Processing and Fee Waiver tasks would populate with today's date instead of the task's completed date.
- Fixed issue where the Disposition fields on the Appeal Close Out page would cut off the length of Additional Dispositions.
- Fixed issue where Custom Field data was not populating in the Advanced Search export.
- Fixed issue where Internal Options for sub-agencies would not reflect changes at the higher-level agency.
- Fixed issue where released records would display requester name and organization in the search results.
- Fixed issue where My Cases dashboard would only pull cases for the user's default acting agency instead of all cases assigned to them.
- Fixed issue where "General" option would not display on New Referral or New Consultation pages.
- Updated record extensions in the quick search results to prevent users from having to select an application to download the file every time.
- Increased length of Send Via field on the 2FA page to prevent longer email addresses from being cut off.

- Updated Comments tab to default sort in descending order of date created.
- Updated the language of “Received Date” and “Business Date of Receipt” on tasks for appeals and consultations.

Other Updates

- Added additional logging to troubleshoot issues with emails sending to requesters.
- Updated ES to not limit the number of referrals being indexed.
- Updated some agencies’ Notification Email Address to no-reply addresses to prevent emails from being denied by email servers.
